

PROFESSIONAL SUMMARY

- ✚ Over 5.1 Years of **Core Software Development Experience in Business Intelligence Application Development and Reporting Portal Development.**
- ✚ **Worked as SAS BI Developer, SAS Programmer And DI Developer.**
- ✚ Ability To Develop & Technical design of ETL components using **SAS Data Integration Studio.**
- ✚ Experience on various procedures like **Proc Means, Proc Summary, Proc Append, Proc Tabulate, Proc Import, Proc Export, Proc Contents, Proc Format, Proc SQL, Proc Sort, Proc Print, Proc Report, Proc Copy** etc.
- ✚ Good knowledge of **SAS Functions, Formats** and **Informats.**
- ✚ Hands on experience with **MACRO – Macro Function, Macro Statements.**
- ✚ Proficiency in using **_NULL_.**
- ✚ Working knowledge with **Parallel Processing.**
- ✚ Experience to handle large data, coded effectively for scalable data using **Pass Through Queries, Hash Table, parallel Processing** etc.
- ✚ Experience in **Extracting Transforming and Loading** source data into the SAS environment from multiple sources.
- ✚ Trained in various data management skills like **Merging, Handling Missing Values, Reading Raw Data Files, Handling Programming Errors, Accessing and Managing Data.**
- ✚ Used **Output Delivery System ODS** To Create Various Formatted Report Like **HTML, PDF** and **RTF.**
- ✚ Expertise in working with SAS DI Transformations **Append, Extract, Table Loader, Lookup, Data Validation, SQL Join, Surrogate Key Generator, Loop, SCD Type 2, File Reader, File Writer, Sort, Splitter** and **User written Transformations.**
- ✚ Knowledge about the **DEPLOYING JOBS (SAS DI).**
- ✚ Scheduling DI jobs in **SAS Management Console.**
- ✚ Proficiency in **SCHEDULING** and **DISTRIBUTE** web reports.
- ✚ Considerably experience in **Data Merging, Data Sub Setting** with the use of **MERGE** and **SET Statements.**
- ✚ Also Working with **Information Map** and **Web Report Studio.**

OBJECTIVE

- ✚ To Become Expertise in the field of **SAS® Programming** and its Associated Business Intelligence Tools Obtain a challenging position of a software developer to make use of my creative abilities, analytical skills and strong knowledge of advanced technologies.

EMPLOYMENT DETAILS

- ✚ Working as a Sr. SAS Consultant with **SAS India Pvt Ltd.** from **Jun 2017** to till date.
- ✚ Worked as a SAS Developer with **WNS Global Services.** from **March 2014** to **jun 2017.**

ACADEMIC QUALIFICATION

✚ BCA from S.M.B.S.T College, Pune University with 61% aggregate.

KEY SKILLS

- ✚ SAS/BASE
- ✚ SAS DI Studio
- ✚ SAS EG
- ✚ SAS Management Console
- ✚ SAS Stored Process
- ✚ SAS AML Solution
- ✚ SAS Web Report Studio
- ✚ Advance SAS
- ✚ SAS Information Map Studio
- ✚ SAS Information Delivery Portal
- ✚ **PLATFORM** :Windows XP, Windows 7, Unix

EXPERIENCE

PROJECT #4.

Project Title	Anti Money Laundering solution for Banks.(Product Versions:6.2,6.3M1,7.1) Clients:- Islami Bank Bangladesh Ltd, IDFC First Bank, HDFC Bank, ICICI Bank.
Period	Jun-2017 to till date
Description	Anti-money-laundering refers to a set of procedures, laws and regulations designed to stop the practice of generating income through illegal actions. Though anti-money-laundering laws cover a relatively limited number of transactions and criminal behaviors.
Role	SAS AML IT Consultant

Responsibilities	I have worked as a Team Member and my responsibilities included: ◆ Doing the client interaction when needed. ◆ Working as SAS DI and AML Developer ,responsible to develop ETL jobs using SAS Data integration studio and scenarios using ECM front end application. ◆ Involved in development of ETL Job, Extracting data from the multiple sources (CSV,DLMSTR, Oracle10g) using SAS/Access, SAS SQL procedures and creation of SAS data sets, Transforming them according to the SAS AML Module and loading the data in to the appropriate data sets using various DI Transformations. ◆ Used file reader, Splitter, SQL join, Table loader, Data validation, Lookup, SCD type 2, Surrogate key generator, Extract, Loop transformations. ◆ Deploying, Scheduling and monitoring of jobs, developed job flows using management console. ◆ To develop the various scenario according to FIU (Financial Intelligence Unit) rules and also developed the custom scenarios according to bank requirement . ◆ Involved the scenario development and configuration of scenarios as per bank logic. ◆ Performed Optimization of various jobs. ◆ Handling production issues and providing the immediate solution. ◆ Developed TRADE base module and its scenarios as per bank requirement (Islami Bank Bangladesh Ltd). ◆ Creating new header as per scenario requirement. ◆ Developed the batch code of CTR STR reports for the Islami Bank Bangladesh Ltd. ◆ Doing the minor customization in ECM application (Versions:6.2,6.3M1). ◆ Scheduled jobs using management console and Unix.
-------------------------	---

PROJECT #3.

Project Title	Data Loading for Inventory Analysis System, Morrison Super Markets and safe way stores (UK).
Period	April-2016 to Jun-2017
Description	Project is to load the data for inventory Analysis system. Source system is Inventory Management System with inventory Balances, demand etc. Data is to be loaded into warehouse using SAS DI studio.
Role	SAS DI Developer

Responsibilities	I have worked as an Team Member and my responsibilities included: ◆ Worked as SAS DI Developer responsible to develop ETL jobs using SAS Data integration studio ◆ Involved in development of ETL Job, Extracting data from the multiple sources (PSV, Oracle10g) using SAS/Access, SAS SQL procedures and creation of SAS data sets, Transforming them according to the business requirements and loading of data in to the appropriate data sets using various DI Transformations. ◆ Used file reader, Splitter, SQL join, Table loader, Data validation, Lookup, SCD type 2, Surrogate key generator, Extract, Loop transformations. ◆ Deploying, Scheduling and monitoring of jobs, developed job flows using management console. ◆ Responsible for registering source and target libraries, used change management system, created project repositories in development. ◆ Created custom transformations, Parameterized job, Run jobs in parallel. ◆ Interacting with the Business Team to understand their requirements and then creating SAS DI jobs, validating jobs of peer team. ◆ Automated SAS jobs running a daily weekly and monthly basis. ◆ In order to improve performance of job Used different types of techniques like used of views, indexes, look up transformation over SQL join, use of loop transformation, running jobs in parallel, use of custom transformation to use data step functionality to join tables, used pass through queries, increased buffer size etc. ◆ Created proper documentation of work.
-------------------------	--

PROJECT #2.

Project Title	Lending Process Analysis, UBS Bank
Period	Dec-2014 to Mar-2016
Description	This project Involves Analysis of Micro Finance data given by customer. It is a reporting and analysis system to analyses total market micro financed given, By monthly, yearly quarterly, by Stores, vendor, products etc. Its Predictive module will tell about trends, risks involved in future.
Role	SAS BI Developer

Responsibilities	◆ I was working as SAS Report Developer using SAS EBI reporting tools. ◆ Roles involves understanding business requirement from design document, Accept changes in design and provide risk analysis and give appropriate time to incorporate changes. ◆ Study DWH data model find relation between different tables to extract data that is required for reports. ◆ Develop SAS Information maps using SAS Information map studio, define relationship between tables, add filters, joins, prompts, pre-filters, create calculated fields, aggregations, grouping etc. ◆ Create proper folder structure on metadata server (foundation repository). ◆ Develop reports using SAS web report studio, Created different types of reports like summary detail, drill down, drill up, used report linking feature, crated reports with different sections, created reports with filters prompts, conditional highlighting etc. ◆ Used different objects in reports like bar chart, tile chart, table, cross tab, stored process, image, header, footer, title in web report ◆ Created reports with group breaks, scheduled and deploy reports to create reports views. ◆ Used data manually refresh feature that is available in web report while saving reports in order to open report fast in next time user can click on refresh data to get recent data in report. ◆ Included in different portlets in SAS IDP like SAS BI dashboard portlet, SAS report viewer portlet, SAS STP viewer, SAS Map viewer Portlet etc. ◆ Create cascaded prompts in map, used identity driven filters, used pre-filters etc. ◆ Developed SAS STP from base SAS(EG) and deployed on metadata server. ◆ Developing E-mail reports and online reports according to business users Requirement by using SAS Publishing framework and channel from management console.
-------------------------	---

PROJECT #1.

Project Title	Action History For Marketing Analysis, HDFC Bank
Period	March-2014 to Nov-2014

Description	HDFC Bank is the leading bank company in India. Responsible for acquisition modeling in the emerging markets of India. As it was not easy to buy geographical and demographic data in India, customer data was built internally by gathering demographic and general information of card members pertaining to diverse product to extract information about solicited and non-solicited responders over a period of time. Compared and analyzed trend and related information from this data to create customer SAS data set and flat file for modelers. These data set were used for capturing new customers through direct mail and telemarketing.
Role	SAS Programmer/Developer
Responsibilities	◆ Create SAS data set from oracle database with random sampling technique and created oracle tables from SAS data sets by using SAS Macros. ◆ Used SAS advanced concepts like parallel processing. ◆ Created custom formats and informats. ◆ Created detail logs and output to in external location. ◆ Created large datasets by combining individual data sets using various inner and outer joins in SAS/SQL and dataset merging techniques of SAS/BASE. ◆ Analyzed data using various statistical PROCEDURES like PROC SUMMERY, PROC MEANS, PROC FREQ, PROC UNIVARIATE, PROC SORT, PROC PRINTTO, ◆ Propose set of action plans to mitigate the risk identified with the sourcing decision. ◆ Use PROC APPEND to load data into oracle. ◆ Generated HTML, Listings, EXCEL,PDF And RTF reports for a presenting finding of various statistical PROCEDURES like PROC REPORT, PROC PRINT, Using SAS ODS.

PERSONAL DETAILS

Name	Mahesh Tatyabhau Dighe
Date of Birth	03july1992
Nationality	Indian
Passport	Yes

DECLARATION

I hereby declare that the above given information is true to the best of my knowledge.

Place: Mumbai

Mahesh Dighe .
